# BUILT FOR SEA MADE FOR LAND

DOUGAN CLARKE IS ON A QUEST TO CRAFT THE WORLD'S ULTIMATE UMBRELLA.

Founder and Chief Product Architect  
Dougan Clarke at his factory in Miami.

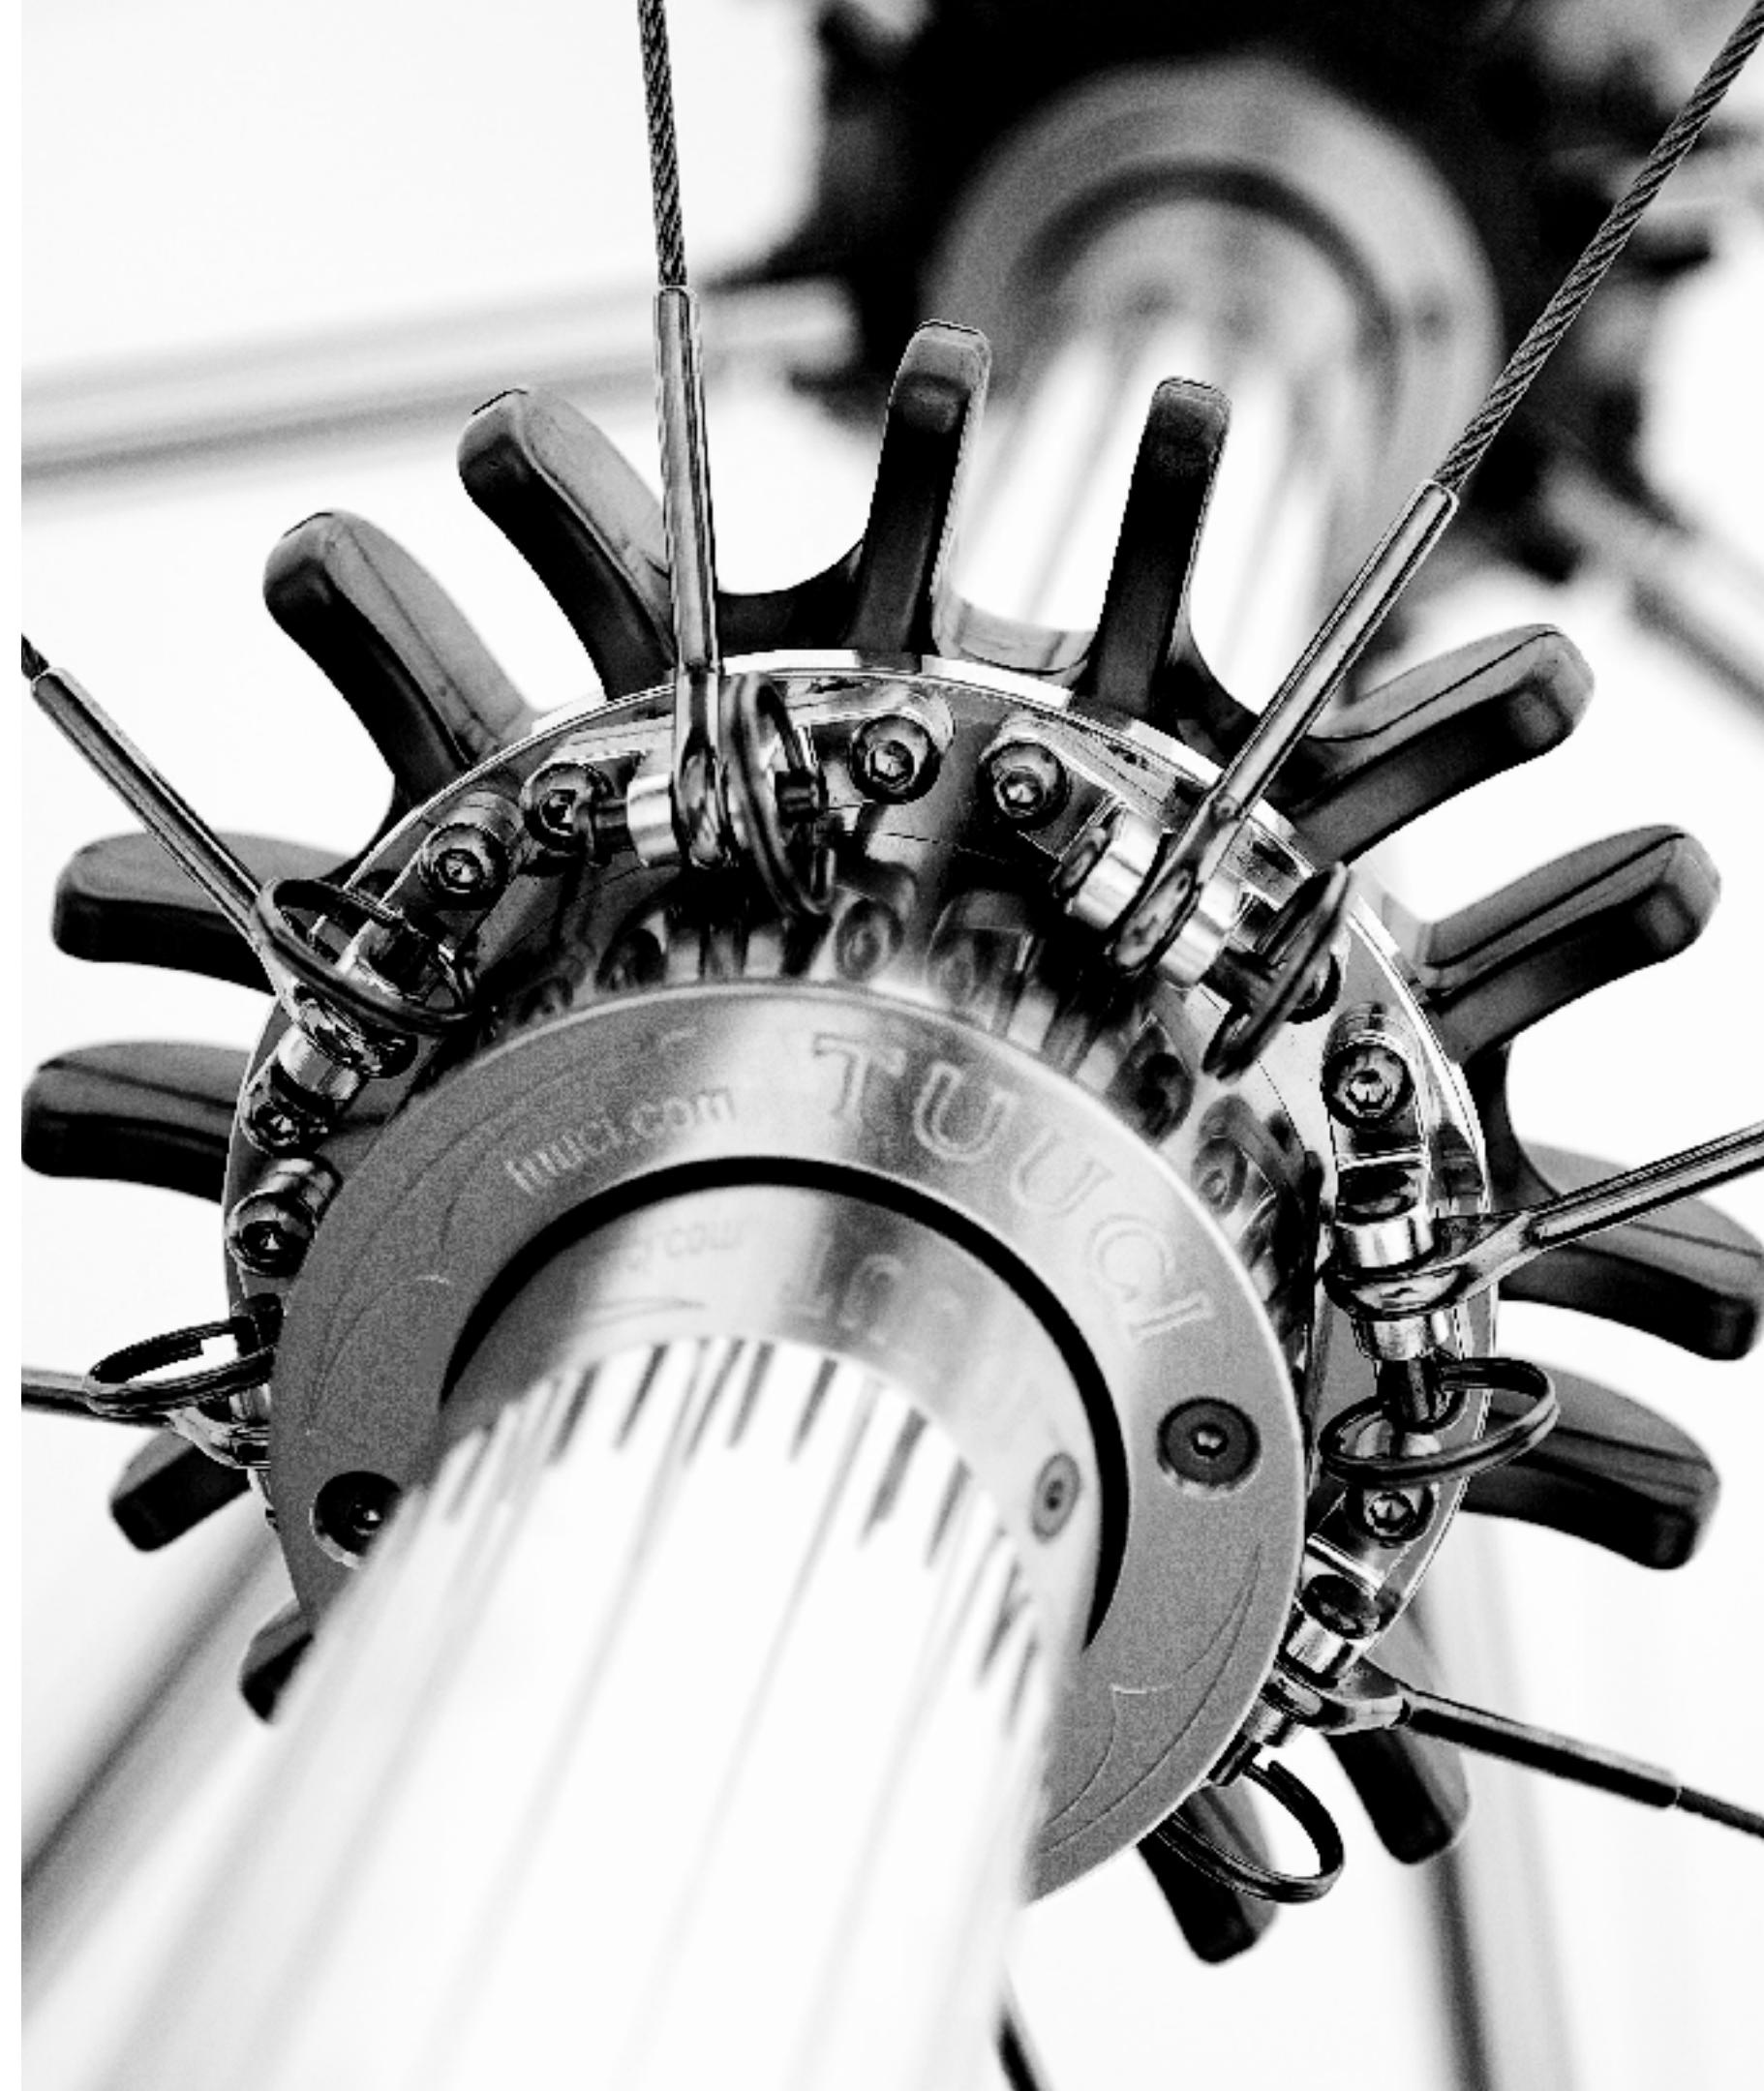

“THE PASSION  
FOR TUUCI®  
COMES FROM  
MY ROOTS  
AS A MARINE  
RIGGER.”

— DOUGAN CLARKE

Growing up in Florida, Dougan Clarke lived and breathed the sea. As a young boy, he was either in or on the water, and apprenticed at a custom boat shop at age 15 to learn the trade. For the next 10 years, he was immersed in marine manufacturing and rigging boats. That first-hand experience, and his self-taught knowledge of nautical engineering, led him on a quest. His goal was simple and his mission clear: to build a better umbrella – one that could withstand even Miami’s extreme weather.

Drawing on his experience as a custom boat rigger, he employed marine-grade materials to build a durable, easy-to-operate umbrella. In a major breakthrough, he designed a central hub system with a bracketed modular construction that allows for replaceable parts, creating the first umbrella with a lifetime of service. He then rigorously tested the design and materials to prove the umbrellas’ superior wind resistance. TUUCI®, an apt acronym for The Ultimate Umbrella Company Inc., was born, with every structure proudly bearing the “Made in Miami” moniker. The result: umbrellas built to the standards of a luxury racing yacht.

More than 20 years later, Clarke’s technical expertise and eye for innovation have earned the company 19 utility and design patents. Exceptional in function, his umbrellas are equally celebrated for their artful form. At home in any environment, TUUCI® is the ultimate in high-performance shade.

# TUUCI<sup>®</sup> OCEAN MASTER MAX
